

Showcasing
SURINAME'S

Palette of Diversity

...From **the most forested nation** in the world

Welcome to SURINAME

Welcome to Suriname, a hidden gem nestled on the northeastern coast of South America. As the smallest country on the continent, Suriname is a land of immense natural beauty and rich cultural heritage. Once a Dutch colony, Suriname gained its independence in 1975 and has since flourished into a vibrant nation known for its diversity and ecological commitment. With a population of just 600,000, Suriname is a mosaic of ten major ethnic groups, each contributing to the country's unique cultural tapestry.

Suriname is a country where nature reigns supreme. It is the most forested nation in the world, with an astonishing 93% of its land covered by lush, pristine forests. The government of Suriname is committed to maintaining this verdant landscape. This dedication has positioned Suriname as a carbon-negative country, absorbing more carbon dioxide than it emits, and showcasing a model of sustainable development that the world can look up to.

The heart of Suriname's commitment to sustainability is its forestry sector. Suriname's forests span approximately 15.2 million hectares, with 9 million hectares earmarked for conservation and 4.5 million hectares designated as production forest. This careful balance ensures that the country's rich biodiversity is preserved while also allowing for the responsible harvesting of timber, which contributes significantly to the national economy.

Suriname's forestry sector is characterized by its sustainable methods of logging, which not only protect but also enhance forest health. The country practices selective logging, which involves carefully choosing which trees to harvest, ensuring that the forest can regenerate naturally. This method, combined with a cutting cycle of 25 years and an average cutting volume of 10 cubic meters per hectare, ensures that the forests remain robust and vibrant.

At the International Woodworking Fair (IWF) in Atlanta, Suriname will showcase its finest wood products, highlighting the country's commitment to quality and sustainability. Buyers can expect to see a variety of products, including rough sawn lumber, cladding, flooring, pergola, decking, mouldings, furniture, and prefab houses. Each of these products is crafted from some of the most exquisite and durable hardwoods in the world, such as Ipe, Purpleheart, Timborana, Basralocus, and Sucupira.

Timborana and Basralocus are particularly noteworthy. Marblewood is highly valued for its unique, striking grain patterns, making it ideal for high-end furniture and decorative purposes. Basralocus, with its excellent durability and resistance to decay, is widely used in heavy construction, especially in marine and freshwater applications. Wana, known for its rich, dark color and fine texture, is sought after for fine woodworking and cabinetry, adding a touch of luxury to any project.

Suriname's commitment to sustainability extends to innovative practices such as underwater logging. The country utilizes submerged trees from its reservoirs, remnants of flooded valleys, to provide high-quality timber without impacting the living forests. This practice not only generates economic value but also contributes to climate protection by preventing the release of methane from decomposing wood.

The forestry sector in Suriname plays a crucial role in job creation, providing employment opportunities for many, particularly in rural areas. It significantly benefits indigenous communities by preserving traditional knowledge and practices related to forest management and sustainable use. The sector not only helps in sustaining the livelihoods of these communities but also adds immense cultural and social value, fostering a deep connection with the natural environment. In

An aerial photograph showing a wide, winding river with a light-colored, sandy or silty bed. The river meanders through a vast, dense, and lush green tropical forest. The sky above is filled with soft, white clouds, and the overall scene conveys a sense of a remote, natural wilderness.

2022, Suriname's wood exports amounted to \$81 million, with major markets in Asia and Europe. The sector has 2 million acres in concession space. Wood production is around 500.000 m3 annually with a maximum of 1 million m3 annually.

Suriname's participation in the IWF is a testament to its rich forestry heritage and commitment to sustainable development. The products on display not only represent the highest quality of Surinamese craftsmanship but also embody the country's dedication to preserving its natural resources for future generations. By choosing Surinamese wood, buyers are not only investing in exceptional quality but also supporting a sustainable and environmentally responsible industry.

We invite you to explore the wonders of Suriname at the IWF, where the beauty of our forests and the excellence of our wood products are on full display. Discover the story of a nation that harmonizes economic growth with environmental stewardship, and experience the unmatched quality of Suriname's finest woods.

Rough Sawn Lumber

Discover the Foundation of Excellence

Suriname's rough sawn lumber stands as a testament to superior quality and sustainable forestry practices. Our forests yield some of the world's most sought-after hardwoods, including ipe and basralocus, known for their unparalleled strength, durability, and aesthetic appeal. For buyers and processors, our rough sawn lumber provides the foundational material for a wide range of high-quality wood products.

Premium Hardwoods: Suriname's forests are rich with diverse hardwood species, particularly Ipe and Purpleheart. Ipe (*tabebuia serratifolia*, GRH) is renowned for its exceptional strength and resistance to marine organisms, making it an ideal choice for heavy construction and marine applications. Purpleheart (*Peltogyne Venosa*, PRH) is celebrated for its vibrant color and mechanical properties, highly prized in fine woodworking and decorative applications.

Ipe

Sustainability Practices: Suriname is committed to sustainable forestry, utilizing practices like selective logging and Reduced Impact Logging (RIL) to ensure the health and regeneration of its forests. Each tree is carefully selected for harvesting, allowing the forest to naturally regenerate and maintain its biodiversity. These practices not only preserve the environment but also guarantee a continuous supply of high-quality timber.

Quality Assurance: Our rough sawn lumber undergoes rigorous quality control from tree selection to final processing. Each piece is meticulously graded to meet international standards, ensuring that buyers receive lumber that is durable, aesthetically pleasing, and suitable for various applications, including construction, furniture making, and high-end joinery.

Purpleheart

Market Applications:

- **Construction:** Ideal for structural components, beams, and marine projects due to its strength and durability.
- **Furniture Making:** Perfect for creating high-quality, long-lasting furniture pieces with unique aesthetic qualities.
- **Flooring and Decking:** Provides a beautiful, durable surface that can withstand heavy use and environmental exposure.

By choosing Suriname's rough sawn lumber, buyers and processors invest in superior quality and support sustainable forest management practices. Discover the foundation of excellence with Suriname's rough sawn lumber and experience the unmatched quality that our forests have to offer.

Cladding, Flooring, (under)decking, and construction lumber

Discover the Foundation of Excellence

Suriname provides a comprehensive range of planking, flooring, pergola, decking, and mouldings crafted from the finest hardwoods, designed to enhance any space with durability and aesthetic appeal. Our commitment to sustainable sourcing and exceptional quality makes these products ideal for buyers and processors seeking reliable, beautiful wood solutions.

High-Quality Hardwoods: Our products are made from premium hardwoods such as Basralocus, Angelim, and Ipe. These species are renowned for their durability, resistance to decay, and visual appeal, making them perfect for both indoor and outdoor applications.

Basralocus (*dicorynia guianensis* amshoff, BAS)

Angelim (*hymenolobium flavum*, MKB)

Ipe (*tabebuia serratifolia*, GRH)

Sustainability Practices: We ensure that all our hardwoods are sourced from sustainably managed forests. Our operations follow strict guidelines such as Reduced Impact Logging (RIL) to minimize environmental impact and promote forest regeneration, ensuring the long-term health and sustainability of Suriname's forests.

Quality Assurance: Each product undergoes stringent quality control to meet international standards. Our planking, flooring, pergola, decking, and mouldings are precision-milled to provide a perfect fit and finish, offering exceptional durability and beauty. Buyers can be confident in receiving the highest quality wood products that will stand the test of time.

Market Applications:

- **Planking and Flooring:** Ideal for residential and commercial spaces, offering a durable and attractive surface.
- **Pergola and Decking:** Perfect for creating beautiful, functional outdoor living spaces.
- **Mouldings:** Adds a touch of elegance to interiors, suitable for crown moulding, baseboards, and decorative trims.

By choosing Suriname's planking, flooring, pergola, decking, and mouldings, buyers and processors invest in top-quality, sustainably sourced wood products that offer timeless elegance and outstanding performance.

Furniture Artistry in Every Piece

Suriname's furniture industry showcases exquisite craftsmanship, utilizing premium hardwoods to create pieces designed to last generations. Combining traditional techniques with modern design, our furniture offers unmatched durability, aesthetic appeal, and sustainability, making it a preferred choice for discerning buyers and processors.

Premium Hardwoods: Our furniture is crafted from the finest hardwoods, including Timborana, Sucupira and Hububali. These woods are selected for their unique grain patterns, strength, and resistance to wear, ensuring each piece is both functional and visually stunning.

Timborana (*pseudopiptadenia suaveolens*, PMS)

Sucupira (*diplotropis purpurea*, ZWK)

Hububali (*Ioxopterygium sagotii*, SLH)

Sustainability Practices: Our furniture is made from sustainably harvested wood, ensuring our products are environmentally responsible. We adhere to stringent sustainability standards, employing practices such as selective logging and forest regeneration to maintain the ecological balance of Suriname's forests.

Quality Assurance: Each piece of furniture undergoes meticulous quality checks to ensure it meets the highest standards of craftsmanship and durability. Our artisans combine traditional woodworking techniques with modern precision tools to create furniture that is both beautiful and robust.

Market Applications: Suriname's furniture is suitable for various settings, including residential, commercial, and hospitality. From elegant dining sets and luxurious bedroom furniture to functional office pieces and bespoke designs, our furniture

enhances any space with its superior quality and timeless design.

Key Features:

- **Durability:** Built to last generations, our furniture withstands daily use and maintains its beauty.
- **Aesthetic Appeal:** Unique grain patterns and rich colors of Surinamese hardwoods add elegance to any interior.
- **Sustainability:** Produced from sustainably harvested wood, our furniture supports environmentally responsible practices.

By choosing Suriname's furniture, buyers and processors invest in pieces that combine artistry, durability, and sustainability. Experience the unmatched quality and craftsmanship of Suriname's finest furniture, designed to enhance any space and stand the test of time.

Prefab Houses

Sustainable Living, Redefined

Suriname's prefab houses offer a revolutionary approach to sustainable living, built from robust and resilient hardwoods that ensure both durability and environmental responsibility. Designed for buyers and processors seeking high-quality, eco-friendly housing solutions, our prefab houses combine the strength of Surinamese timber with innovative construction techniques.

Robust Hardwoods: Our prefab houses are constructed using some of the strongest and most durable hardwoods, such as Wana and Djindja udu. These species are known for their exceptional strength, resistance to decay, and ability to withstand harsh environmental conditions, making them ideal for building long-lasting, sustainable homes.

Wana (*eschweilera pedicellata*, WAN)

Djindja Udu (*Buchenavia tetraphylla*, DJI)

Sustainability Practices: Our prefab houses are designed with sustainability at their core. We utilize sustainably harvested wood, following practices such as Reduced Impact Logging (RIL) and forest regeneration to ensure the long-term health of our forests. Additionally, the prefab construction process minimizes waste and maximizes efficiency, reducing the overall environmental impact.

Quality Assurance: Each prefab house is built to the highest standards, ensuring superior quality and durability. Our construction methods combine traditional craftsmanship with modern technology, resulting in homes that are not only beautiful but also robust and environmentally responsible.

Market Applications:

- **Residential Housing:** Ideal for creating sustainable and durable homes that meet modern living standards.
- **Commercial Buildings:** Perfect for eco-friendly offices, retail spaces, and other commercial structures.
- **Community Projects:** Suitable for developing sustainable housing solutions in communities, offering quick and efficient construction.

By choosing Suriname's prefab houses, buyers and processors invest in innovative, sustainable housing solutions that combine strength, durability, and environmental responsibility. Redefine sustainable living with Suriname's prefab houses and experience the strength and resilience of our finest hardwoods.

A photograph of a dense tropical forest. In the foreground, there are various types of trees, including palm trees and broad-leafed species. A large, prominent tree with a wide, spreading canopy stands in the middle ground. The background is filled with more forest, and a thick layer of white mist or low clouds hangs between the trees, creating a sense of depth and atmosphere. The overall color palette is dominated by various shades of green, from deep forest greens to lighter, misty whites.

Representing the pinnacle of Suriname's forestry sector, our catalogue features esteemed companies dedicated to delivering exceptional wood products while championing sustainability and job creation. These companies embody Suriname's commitment to quality, innovation, and responsible forestry practices.

Company Overview: Taco Oso was established in 2017 as a subsidiary of N.V. Cornelly's GALA-XY. Initially, it began as a pilot project for affordable housing under the LISP program of the government, aimed at poverty alleviation. Despite the project's initial phase ending, the potential was recognized, leading to the establishment of prefab wooden homes to add value to Suriname's timber resources, create jobs, and promote affordable housing.

Products and Services: Taco Oso offers packages for homes that can be up to 98% wood. The company specializes in prefabricated wooden homes that can be constructed in a fraction of the time traditional methods require, significantly reducing costs and promoting self-building with detailed manuals.

Market Position: The company has established its name through its website, social media, and participation in local fairs. Taco Oso's unique selling proposition lies in offering prefabricated homes that utilize more than 80% locally sourced materials, ensuring cost-effectiveness and quality.

Sustainability Practices: By using Walaba wood, Taco Oso guarantees termite-resistant homes. Where necessary, wood is treated with environmentally friendly methods to ensure longevity and safety.

Innovation and Technology: Taco Oso collaborates with specialized partners and continuously seeks improved techniques to elevate product standards, ensuring the use of cutting-edge technologies.

Export Experience: Taco Oso has successfully exported home packages to French Guiana and Bonaire, demonstrating the company's capability to cater to international markets with high customer satisfaction.

Future Goals: The company is preparing for an expansion into Barbados with a pilot project involving beach apartments and a restaurant. This initiative aims to franchise Taco Oso's innovative housing solutions throughout the Caribbean.

Company Culture: Taco Oso values collaboration, continuous improvement, and excellence. The team consists of dedicated professionals committed to delivering high-quality, innovative products while maintaining strong communication with clients.

GREENHEART

SURINAME

Company Overview: Greenheart Forest Central N.V. began its forestry and sawmilling operations in 2011, promoting sustainable forest management and achieving high international certification

standards. The company works closely with local operators to elevate sustainability and market Surinamese wood species internationally.

Products and Services: The company specializes in decking, flooring, cladding, construction lumber, sleepers, underlayers, furniture, posts, lobster traps, track flooring, doors, and round logs. All products are produced under sustainable forest management practices.

Market Position: Greenheart positions itself as a provider of sustainable wood products that adhere to national and international standards, offering high-quality materials for various applications.

Sustainability Practices: The company employs sustainable forest management, reduced impact logging, and comprehensive forestry planning to balance production with environmental and social responsibilities.

Innovation and Technology: Greenheart utilizes advanced technology for log tracking, production monitoring, and forestry planning, ensuring efficient and responsible operations.

Export Experience: Greenheart serves markets in Europe, Asia, North America, and Africa, supported by a dedicated export and logistics team.

Future Goals: Greenheart aims to expand its processing activities, introduce new products, and market lesser-known species of Surinamese wood, seeking new clients globally.

Company Culture: The company emphasizes teamwork, a safe work environment, social responsibility, and maintaining strong work ethics to achieve sustainable success.

Company Overview: Founded by Sieuwsankar Poeran in 1982, S. Poeran N.V. transitioned to a corporation in 1991. The company is renowned for its bespoke wooden products, offering windows, doors, frames, and custom furniture, all crafted to meet specific customer requirements.

Products and Services: S. Poeran N.V. specializes in high-quality, custom-made wooden products including windows, doors, frames, and furniture. The company emphasizes sustainability and excellent customer service.

Market Position: Holding an estimated 10% market share among Suriname's furniture companies, S. Poeran N.V. collaborates with similar businesses to enhance product quality and market presence.

Sustainability Practices: The company adheres to environmental regulations and promotes sustainable practices by utilizing wood waste in various agricultural sectors.

Innovation and Technology: S. Poeran N.V. integrates small and large machinery to facilitate efficient production processes, enhancing product quality and worker safety.

Export Experience: The company has exported products to Trinidad and Tobago, participating in the Trade & Investment Conference (TIC) and sending shipments to other regions including the Netherlands and French Guiana.

Future Goals: S. Poeran N.V. aims to expand its export capabilities, invest in a drying chamber, and upgrade its production facilities to meet international standards.

Company Culture: The company prides itself on hard work, teamwork, excellent customer service, and maintaining high-quality standards.

Website: www.spoerannv.com

Company Overview: Established in 1992, Ramzon N.V. is a renowned wood processing company in Paramaribo, Suriname. Initially starting with a 2,400 m² plot, the company has expanded to 16,488 m². Ramzon N.V. is notable for employing a diverse workforce, including individuals with disabilities, earning the company a Workability Award in 2009.

Products and Services: Ramzon N.V. operates three main production halls focusing on doors, windows, frames, flooring, decking, mouldings, shipping crates, and pallets. The company is especially known for its colonial jalousie windows, which are primarily used in the restoration of colonial buildings in Paramaribo.

Market Position: Ramzon N.V. is highly regarded for its quality products and efficient kiln drying processes, which provide a significant competitive advantage. The company offers a one-year guarantee on its products, reinforcing its reputation for reliability.

Sustainability Practices: Ramzon N.V. continuously updates its practices by participating in international trade fairs such as LIGNA in Germany, ensuring it remains at the forefront of the latest techniques and sustainable practices.

Innovation and Technology: The company integrates advanced machinery and equipment in its production processes, ensuring high efficiency and product quality.

Export Experience: Ramzon N.V. currently provides processing services to third parties, which export to markets in America and Europe. The company's longstanding presence and commitment to quality have secured its position as a reliable partner in the wood processing industry.

Future Goals: Ramzon N.V. aims to become fully export-oriented, expanding its reach in international markets.

Company Culture: Ramzon N.V. fosters a collaborative work environment with a focus on quality, safety, and customer satisfaction. The company values innovation and sustainability, ensuring a positive impact on both its workforce and the environment.

Company Overview: Randoe Suriname NV, a family-owned company located at Dr. Sophie Redmondstraat 250, Paramaribo, was founded in 1954 and registered in 1956. Managed by the third generation, the company is known for its high-quality furniture made from locally harvested timber.

Products and Services: Randoe offers a wide range of solid wood and upholstered furniture, ISPM-15 certification, kiln drying services, and furniture restoration. In 2024, Randoe will introduce a new line: Home Decor by Randoe Suriname.

Market Position: Randoe is recognized for its top customer service, high-quality sustainable products, and decades of experience in woodworking and upholstery.

Sustainability Practices: Randoe uses locally harvested wood through sustainable forestry practices and minimizes waste by repurposing leftover materials. The company also uses an air system to reduce electrical consumption.

Innovation and Technology: Randoe stays updated on new technologies and integrates them into its production processes while balancing costs and income.

Future Goals: Randoe aims to expand its export capabilities and provide unique products to neighboring countries, despite logistical challenges.

Company Culture: Randoe values family, inclusion, integrity, trust, craftsmanship, top customer service, and a personal approach.

SOEKHOE & ZONEN N.V.

Company overview: Soekhoe & Zonen was founded in 1962 by Mr. Siewdjagat Soekhoe as a sole proprietorship for the exploitation of round wood to local sawmills. In 1977, the company was transformed into a limited liability company named Hout Exploitatie en Verwerkingsonderneming Soekhoe & Zonen N.V. (Logging and Wood Processing Company Soekhoe and Sons Ltd). The first sawmill began production in January 1998, followed by the second sawmill in 2006 and the third in 2013. In November 2015, an existing sawmill named Surinaamse Hout en Hout Verwerking Industrie N.V. was acquired, renovated, and brought up to Soekhoe & Zonen N.V. standards. The company owns an FSC-certified concession of 21,750 hectares and operates five complete sawmills with kiln drying facilities.

Products and Services:

- Wood tiles
- Crane mats in all sizes
- Basralocus beams (5m-20m lengths)
- Rough sawn/finished decking
- Table tops
- Heat-treated pallets
- Window/door frame materials
- AD/KD construction timber
- Kiln dry facility

Market Position: We position ourselves as a certified sawmill company with a competitive edge in producing unique wood products that competitors do not offer.

Sustainability Practices: The company adheres to certification principles and conditions, focusing on sustainable forest management.

Innovation and Technology: We integrate innovation and technology into our production processes to maintain high standards and efficiency.

Export Experience: In May 2021, Soekhoe & Zonen N.V. participated in the harbor project in Harlingen, Netherlands, supplying all the poles used in the project.

Quality and Standards: The company is certified by Preferred by Nature™ with FSC™ trademark license codes FSC-C126323 and FSC-C125373.

Future Goals: Future goals include developing finger-jointed products and creating a market for products made from residual wood materials as quality end products.

Company Culture: The company upholds strong leadership, communication styles, and values, ensuring positive working conditions, productivity, and customer satisfaction.

Sento Furniture

Company Overview: Sento Furniture was founded in August 2019 by Soviento Bakapai, who transitioned from a career as a photo videographer to furniture design due to the COVID-19 pandemic. Inspired by innovative designs seen on YouTube, Soviento started creating furniture pieces from his bedroom, quickly gaining positive reactions and growing the business.

Products and Services: Sento Furniture offers a wide range of custom-made furniture, known for its unique designs and high-quality craftsmanship. Each piece is tailored to the customer's specific needs, ensuring a perfect match of style and functionality. The company also provides complementary services such as interior advice, delivery, installation, maintenance, and repair.

Market Position: Sento Furniture positions itself as a leading provider of tailor-made, innovative, and sustainable furniture solutions. The company's competitive advantages include personalized service, comprehensive offerings, and a strong focus on customer satisfaction.

Sustainability Practices: The company emphasizes sustainability by designing durable, long-lasting products that reduce waste and the need for frequent replacements. Sento Furniture uses sustainable materials and environmentally friendly practices to minimize its ecological footprint.

Innovation and Technology: Sento Furniture integrates innovation and sustainable materials into its production processes, ensuring high-quality and responsible furniture production. Although the company does not use advanced technologies, it focuses on eco-friendly methods to meet customer needs.

Export Experience: Sento Furniture has exported products to French Guiana, where orders are delivered to Albina and then transported by boat to Saint Laurent.

Quality and Standards: The company adheres to self-established quality standards to ensure the highest quality of its products, focusing on durability, craftsmanship, and aesthetics.

Customer Stories: One of Sento Furniture's success stories involves a furniture piece featured in a music video by a well-known artist, which increased interest in the company's unique and stylish designs.

Future Goals: Sento Furniture aims to expand internationally, enhance its online presence, and diversify its product line. The company aspires to grow and be recognized worldwide for its innovative designs and high-quality products.

Company Culture: The company culture at Sento Furniture is innovative, customer-oriented, and sustainable. The team values creativity, collaboration, and providing a positive work environment where every member contributes to the company's success.

Agency for Forest Management and Production Control (SBB)

Company Overview: The Foundation for Forest Management and Production Control (SBB) was established to oversee the sustainable management and monitoring of Suriname's forest resources. The foundation was created to ensure the protection, conservation, and responsible exploitation of the country's forests. Over the years, SBB has developed into a key institution in promoting sustainable forestry practices in Suriname.

Products and Services: SBB offers a range of services including forest monitoring, management, and certification. The foundation is also responsible for issuing permits for forest exploitation and conducting research on forest resources. What makes SBB unique is its comprehensive approach to balancing ecological conservation with sustainable economic development.

Market Position: SBB positions itself as a leader in sustainable forest management in Suriname. Its competitive advantages include its extensive expertise, robust monitoring systems, and commitment to international standards of sustainability.

Sustainability Practices: SBB follows rigorous sustainability practices such as promoting reduced impact logging and reforestation. The foundation also engages in continuous research and monitoring to ensure the long-term health of forest ecosystems. SBB's initiatives include community engagement programs to support local livelihoods while promoting sustainable forestry.

Innovation and Technology: SBB incorporates advanced technologies such as Geographic Information Systems (GIS) and remote sensing for forest monitoring and management. These technologies enable precise tracking of harvested trees, illegal logging activities, and resource allocation. Innovation in these areas ensures more efficient and effective forest management by implementing the Sustainable Forest Management System (SFISS).

Export Experience: SBB facilitates the export of forest products from Suriname to various international markets, including Europe and Asia. The foundation ensures that exported products meet stringent environmental and sustainability standards, which enhances their appeal in global markets.

Quality and Standards: SBB adheres to internationally recognized standards such as the Forest Stewardship Council (FSC) certification. This ensures that all forest products managed under SBB's purview meet high standards of environmental and social responsibility.

Customer Stories: One notable success story involves a collaboration with the private forestry sector and the local community to implement sustainable forest management practices, including the implementation of the Code of Practice.

Future Goals: SBB aims to expand its reach by increasing the number of certified forests and promoting sustainable forestry practices globally. Future goals include enhancing technological capabilities for better forest management and developing its own building.

Company Culture: SBB's company culture is rooted in sustainability, integrity, and collaboration. The team values transparency, innovation, and a strong commitment to environmental stewardship. These values guide the foundation's operations and its engagement with the sector. products at IWF 2024.
